

I am shocked to learn that you want to stop XM Satellite Radio from providing local traffic and weather channels. I find these channels extremely helpful. I no longer have to wait for the exact moment on other stations to "catch" the traffic updates which don't always cover the entire city. I am paying for this service and I see no need why it should be stopped. Please reject NAB's petition 04-160 so that people who are willing to pay for a service can continue to receive it. Thank you.
